## [Swan 11m workboat](#)

The “Swan” is a steel, Beaver type, workboat with a proven performance in civils work.

She is seaworthy, provides a stable working platform and is often fitted with a permanent diving station to support underwater work. When fitted the “A” frame in conjunction with the 2 drum hydraulic winch and pot hauler enables equipment (of up to 500kg) to be positioned and recovered. Licensed to carry 12 passengers

Divers have easy access to the water via the, cut away, stern or by ladder.

The wheelhouse provides shelter for up to 6 people and the large open deck area can be used for transporting materials and equipment or as a working platform.
