## Pioner Multi

### Specification:

Length:	4.8m
Width:	2.0m
Weight:	330kg
Load:	5 persons or 405kg
Engine:	50hp mariner outboard
Speed:	28kts

The Pioner Multi is taken to the job on a high-speed road trailer and launched from a beach or slipway.

It transits to the worksite at speeds of up to 30kts with wave heights of up to 2 meters. At the dive site the bow ramp is lowered to assist the diver entering and leaving the water.

The pioner is built in Norway of maintenance free polyethylene and used by the coastguard and rescue services.

It is fitted with a steering console, windscreen, A-frame, radio and navigation lights.

High visibility orange in colour and technically un-sinkable and self bailing it makes an ideal safety boat.
